CODE QUALITY	SECURITY	TOTAL FINDINGS	CRITICAL	HIGH	MEDIUM	LOW	
98 /100	70 /100	4	2	1	0	1	

EXECUTIVE ASSESSMENT

Security posture requires immediate attention to resolve 2 critical vulnerability(ies). Code quality is rated 98/100 (Excellent / Strong) and security is rated 70/100. Critical findings must be remediated prior to deployment.

TOP PRIORITY FINDINGS (MAX 3)

REMEDIATION ROADMAP

[CRITICAL] SQL Injection Vulnerability Line 2 • Security SQL query is constructed using string concatenation. Use parameterized queries (e.g.,...
[CRITICAL] SQL Injection Line 2 • Security SQL query string dynamically concatenated on line 2. Attackers can alter query logic to bypass...
[HIGH] Potential SQL Injection in execute() call Line 3 • Security Query variable passed to execute() without parameter tuple. Ensure the query is parameterized.

IMMEDIATE:	Resolve all 2 Critical finding(s) immediately before deployment.
HIGH PRIORITY:	Address 1 high-severity vulnerability(ies) prior to PR merge.
FOLLOW-UP:	Schedule 1 medium/low code-quality item(s) for routine maintenance.

CODE QUALITY	SECURITY POSTURE	REVIEW OUTCOME
98/100 (Excellent / Strong)	70/100 (Needs Improvement)	REJECTED
Assessment Summary: Critical vulnerability remediation required. Code Quality: Excellent / Strong Security: Needs Improvement.
