

Project / Review:	SentinelAI	Language:	Python	Review Date:	2026-08-13 15:25:10	Execution Time:	56.88 s
CODE QUALITY	SECURITY	TOTAL FINDINGS	CRITICAL	HIGH	MEDIUM	LOW	
95 /100	90 /100	2	0	1	1	0	

EXECUTIVE ASSESSMENT

Overall code health is strong. one high-severity security issue and 1 maintainability issue(s) should be addressed before release. Security score is rated 90/100 (Excellent / Strong).

TOP PRIORITY FINDINGS (MAX 3)

[HIGH] Hardcoded Authentication Logic

Line 4 • Security

Hardcoded credential comparison detected. Use a secure database lookup and password hashing verification.

[MEDIUM] Maintainability Score: 71.3/100

Line 0 • Code Quality

Code maintainability score is 71.3/100 based on Halstead volume (80.0), total cyclomatic complexity (1),...

REMEDIATION ROADMAP

IMMEDIATE:

No critical findings requiring emergency remediation.

HIGH PRIORITY:

Address 1 high-severity vulnerability(ies) prior to PR merge.

FOLLOW-UP:

Schedule 1 medium/low code-quality item(s) for routine maintenance.

CODE QUALITY	SECURITY POSTURE	REVIEW OUTCOME
95/100 (Excellent / Strong)	90/100 (Excellent / Strong)	NEEDS CHANGES
Assessment Summary: Strong overall code health (Excellent / Strong) with high-priority security remediation requested.
