EXECUTIVE ASSESSMENT

Security posture is solid (90/100), but minor items require attention. Good code quality (95/100) with minor maintainability suggestions to clean up.

TOP PRIORITY FINDINGS (MAX 3)

[HIGH] Hardcoded Authentication Logic

Line 4 • Security

Hardcoded credential comparison detected. Use a secure database lookup and password hashing verification.

[MEDIUM] Maintainability Score: 71.3/100

Line 0 • Code Quality

Code maintainability score is 71.3/100 based on Halstead volume (80.0), total cyclomatic complexity (1),...

REMEDIATION ROADMAP

IMMEDIATE:

No Critical findings requiring immediate action.

HIGH PRIORITY:

Address 1 High severity vulnerability(ies) prior to release.

FOLLOW-UP:

Schedule 1 Medium/Low item(s) for routine cleanup.

CODE HEALTH SUMMARY

Code Quality: 95/100

Security: 90/100

Overall Findings: 2

Interpretation: Strong overall structure, but security remediation is urgently required.
